

Job Posting Information for:

Clinical Informatics Librarian

Job Number: 003296

Duties:

The Clinical Informatics Librarian builds dynamic, collaborative relationships within the Jefferson clinical environment by providing a variety of specialized information services and individual consultations and by participating as a member of research- and knowledge-management-related project teams. He/she will be expected to attend clinical research committee meetings, clinical rounds, leadership and management meetings, journal clubs, seminars, case-conferences and other appropriate clinical forums, contributing expertise in advanced information and knowledge management practices. As a member of the Information Services team, he/she will participate in evaluating, planning, and developing clinical support services. Additionally, the Clinical Informatics Librarian will be involved in supporting the information needs of TJU faculty, researchers and students.

Requirements and Qualifications:

Master of Science/Information Science, ALA-Accredited MLS

Clinical Degree strongly preferred

Five to eight years experience in a healthcare or biomedical environment

Excellent oral and written communication skills

Ability to interpret clinical literature

Facility with technical writing
