

CLINICAL INFORMATICIST

Support the overall clinical transformation from the current paper state to an electronic medium for the inpatient and outpatient patient care areas across the Virtua enterprise. Provide the necessary evaluation of clinical workflows and processes for care delivery pre- and post clinical information system implementations and document current and future state clinical workflow processes.

Position Responsibilities:

- * Support the implementation of new systems through the Design, Build, Testing, Training and Implementation phases.
- * Act as the clinical contact to the customer group for migration to a fully digital environment and the integration of all work flows and devices into the EMR
- * Work with operations leadership to optimize the physical and digital work environment and provide ongoing support in all clinical systems employed by their customers
 - * Identify the need for and advocate for IT system additions, modifications, and enhancements. Provide input on the IT strategic plan as it relates to clinical systems, technology and workflow
 - * In an ongoing manner, process map all important customer work streams, identifying inefficiencies and bottlenecks, and mobilizing appropriate improvement resources
 - * Proactively identify/escalate user needs and operational issues that impact workflow or project success
 - * Works with clinical committees and operational leaders on content, policy design, and training
 - * Adheres to IS Business Practices and available for 24/7 support as needed.

Position Qualifications Required

Experience Required:

- * 5-7 years experience in a clinical environment
- * Strong analytical / problem solving skills, outstanding communication skills.
- * Demonstrated aptitude or interest in digital systems/tools, and a demonstrated history of top performance.

Required Education:

- * Masters Degree in Nursing or Clinical Informatics

Training/Certifications/Licensure:

* RN or other allied health degree (e.g. Pharmacist, Resp Therapist)
